

The Town of Bluffton contracts with Waste Management to provide the recycling and garbage pick-up for the residents within the town limits.

One small recycle bin and one garbage cart with a lid and wheels will be provided to each residence without requiring a deposit on these items.

It will take about 10-14 working days for the containers to be delivered after the Town is notified that a resident is occupying a dwelling.

Garbage pick-up is on Wednesday for most areas, the Simmonsville Road/ Buck Island area have garbage pick-up on Thursday. The Town of Bluffton is in a state of transition at the present time and cannot give times when these pick-ups will be made. All containers should be at the curb on the night before the scheduled pick-up so that your containers do not miss being picked up.

Waste Management is using automated trucks for these pick-ups and will not pick up any thing that is outside of the containers. This includes cardboard boxes. If you have any extra bags of garbage or recycling, you can take these to the Container Site on Simmonsville Road. This is an attended site. And all residents may use this at no charge. The hours are 7am to 7pm. 7 days a week. The Container Site is a County facility.

Waste Management will not deliver any containers to a dwelling that is still under construction—please do not call or have the new owners/residents call to get on the list until they are at least in process of moving into the residence.

The home owner does not pay any fees for these recycle/garbage pick-ups. They are part of the expenses that are paid from the property taxes collected on each residence.

If there are any questions or to begin pick-up please contact:
